- a Tom Holmes from West Midland, England, has 11,650 different neck ties. He often gets a tie as a birthday present. Even the British Prime Minister has sent him some.
- b Heinz Schmidt-Bachem collects plastic and paper bags. He's got more than 150,000 bags in his collection. He collects bags from everywhere; from the local grocers, from book shops and clothes shops. He also has bags from famous designer boutiques.
- c Harold Swanger lives in Ohio, USA. He owns the largest collection of mugs. He started collecting mugs in 1972 and now he has got more than 4,500 items.
- d Michael Zarnock (USA) has a collection of 3,711 Hot Wheels® model cars. He started his collection in 1968.

### My Day!

Task 15 - p.120-1

- 1 Read Tina's daily routine and number the activities in the order she does them. There are two extra pictures you do not need to use.

Hi! My name's Tina. My weekdays are usually very busy. My alarm clock rings at 7.30. I have a good breakfast, usually milk and cereals. Then I run to the bus stop to catch the school bus. Lessons start at 8.15. At school we work hard for six or seven hours every day. I come back home at about 2.30. My parents are already at home so we have lunch all together. I like that! After lunch I listen to music for a while to relax. I do Tae Kwon Do on Mondays, Wednesdays and Fridays. When I come back home I do my homework. Sometimes we don't have much homework so I send e-mails to my key pals or surf the Net. My mum keeps telling me to clean my room but I don't because I don't like doing the housework. I usually go to bed dead tired at 11 o'clock.

## GLOBAL WARMING

## TEEN newspaper

Global warming is a big problem, but there are many little things we can do to make a difference and reduce the greenhouse gases that pollute the atmosphere.

Many greenhouse gases come from things we do every day. These gases trap energy in the atmosphere and make the Earth warmer.

Here are some things you can do to help:

1. Carpooling can save energy. Instead of four people driving four cars to work, they can ride together in one car.
2. Turn off the TV, the computers and the lights when you don't need them.
3. When you buy, buy cool stuff. There are some products -certain cars and stereos, for example- which don't use much energy.
4. Walk, ride your bike or take the bus. It saves energy.
5. Plant trees. They absorb carbon dioxide from they air.
6. Solar energy is energy that comes from the sun. Use solar energy to heat homes, buildings and water.

## Emoticons!!!

## TEEN newspaper

Do you use your mobile to send text messages? Do you know when your friends are happy or sad?

"Talking" through messages is really cool. It's fast and cheap. But, can we understand how a person we cannot see really feels? Can we show feelings in our messages?

The solution is "emoticons"! ... "Emoticons" is a new word made up of two other words, emotions, that is feelings, and icons. Emoticons are little face-pictures made out of letters, numbers, or

punctuation marks from our computer or mobile keyboard. So why are they good? Because they let people know how we feel without saying "I am happy" or "I am bored".

It's a bit difficult at the beginning but once you get used to this code, you'll see that emoticons are a fun way to get your message across! ...

Can you match these emoticons with their meanings?

**HOW MUCH DO YOU KNOW ABOUT OUR SOLAR SYSTEM?**

**THE SUN**  
Did you know that the sun is much cooler than its atmosphere?

**SATURN**  
Saturn is many scientists' favourite planet. Its beautiful rings are 169,800 miles wide. Saturn has more moons than any other planet.

**NEPTUNE**  
For many centuries people did not know that this planet existed. It was discovered by Johann Galle and Heinrich D' Arrest in 1846.

**PLUTO**  
Pluto is so small that many scientists don't think it is a planet at all. It is the only planet that has never been visited by a spacecraft. That's why we know very little about it.

**MARS**  
Mars excites scientists because it is more like the Earth than any of the other planets. Mars once had rivers, streams, lakes, and even an ocean. Today the only water on Mars is frozen. Mars has much higher mountains, and far deeper canyons than the Earth. It also has the solar system's biggest volcano, Olympus Mons.

**MERCURY**  
Mercury is a world of extremes. Because it is so close to the sun a visitor could easily cook to death. However, because it turns round so slowly it gets very cold in the night time, which means a visitor could also freeze to death.

**URANUS**  
Uranus is a very strange planet. Scientists think Uranus has a huge water ocean under its clouds. It has a large rocky core, and it could contain trillions of large diamonds.

# Emoticons!!!

# TEEN newspaper

Do you use your mobile to send text messages? Do you know when your friends are happy or sad?

"Talking" through messages is really cool. It's fast and cheap. But, can we understand how a person we cannot see really feels? Can we show feelings in our messages?

The solution is "emoticons"! ... "Emoticons" is a new word made up of two other words, emotions, that is feelings, and icons. Emoticons are little face-pictures made out of letters, numbers, or

punctuation marks from our computer or mobile keyboard. So why are they good? Because they let people know how we feel without saying "I am happy" or "I am bored".

It's a bit difficult at the beginning but once you get used to this code, you'll see that emoticons are a fun way to get your message across! ...

Can you match these emoticons with their meanings?
